ACHIEVEMENTS

319/26651 Leetcode Contest 387

2019 Fist Price chess competition

COURSEWORK

GRADUATE

Object-Oriented Programming (OOP) using C++

data structures and algorithms in c++ database management system

Object-Oriented Programming (OOP) using java

python

EXPERIENCE

LAYER UI | FULL STACK DEVELOPER & FOUNDER

march 2024 – Present | Hyderabad

- Established and led the development of a comprehensive animated UI components library, facilitating streamlined and efficient development processes.
- Simplified coding workflows for developers by providing pre-built UI components, eliminating the need to start from scratch and accelerating project timelines.
- Project-Link:// <https://layerui.com/>

FREELANCE DEVELOPER jan 2024 – march 2024 | Remote

- Developed end-to-end web and native applications using React, Next.js, Prisma, Firebase, React Native, Supabase, SQL, and Tailwind CSS based on client requirements.
- Received excellent feedback from clients for delivering high-quality, efficient, and user-friendly projects.

WECODE WEB DEVELOPMENT INTERN

jan 2023 – april 2023 | Hyderabad

- Enhanced UI for improved student interaction with the website.
- Optimized backend performance, increasing website speed and efficiency

PROJECTS

CHATDOC Oct 2023 - Dec 2023

- Developed an AI-driven document chat system, enabling users to upload documents and receive context-aware responses based on the provided content.
- Implemented an innovative document chat system integrating AI for context-aware interactions, optimizing productivity while fostering intuitive engagement between users and documents
- Project-Link:// chatdoc.ai

SPECTO Aug 2023 - Oct 2023

- Specto transforms agency management with its comprehensive suite of tools, facilitating goal setting, progress tracking, and web design—all in one platform.
- Through its intuitive interface and dynamic charting capabilities, Specto simplifies multitasking and optimizes performance monitoring, empowering agencies to achieve their objectives efficiently
- Project-Link:// specto.com

COURSE

100XDEVS Jun 2023-Dec 2023

- Completed "100xdevs" course, gaining expertise in MERN stack development, basic DevOps principles, version control with Git, backend fundamentals, and WebRTC technology for real-time communication applications.

Skills

• TypeScript • Next.js • Recoil • Docker • AWS(EC2) • GitHub • CI/CD • git • Prisma • Sql • costum hooks • graph.ql • redis
